

Module 11 - Assignment 1

1. Insertion Anomaly

It is necessary to know the VisitNo, ProvNo for every entry as (VisitNo, ProvNo) is the primary key of the table.

2. Update Anomaly

If we change the PatAge of PatNo P1, then we will have to change two entries in the table.

3. Deletion Anomaly

If we delete ProvNo D3 then we will lose data about a visit.
