

```
SELECT *  
FROM RESOURCETBL  
WHERE RATE BETWEEN 10 AND 20;
```

The screenshot shows a database management interface. At the top, a toolbar contains icons for file operations, execution, and search. A dropdown menu is set to "Limit to 1000 rows". Below the toolbar, a SQL editor displays the query: `SELECT * FROM RESOURCETBL WHERE RATE BETWEEN 10 AND 20;`. The query is numbered 1, 2, and 3 on the left margin. Below the editor, a "Result Grid" tab is active, showing a table with 4 rows and 4 columns: #, RESNO, RESNAME, and RATE. The table contains data for resources R100 through R103, with their respective rates. The "Filter Rows" section is empty, and the "Edit" section shows icons for editing, adding, and deleting rows.

#	RESNO	RESNAME	RATE
1	R100	attendant	10
2	R101	police	15
3	R102	usher	10
4	R103	nurse	20
